Creating a PDF catalog of selected artworks

Generate a PDF catalog for a Collection, Exhibition, location, specific artist, and more.

Written by Art Galleria

Updated over a week ago

You can create PDF catalogs for sections of your inventory, including a Collection, Exhibition, artist or location.

How artworks are ordered in the catalog

When you create a Standard Collection or Exhibition, you can manually select an order for the artworks, and this will be reflected in the catalog. Otherwise, you can order artworks by criteria such as artwork name, artist name, artwork year, etc. For instructions on manually ordering Collection or Exhibition artworks, please see [Setting the artwork order in a Standard Collection or Exhibition](#).

This article covers how to generate a PDF catalog. Watch our video demonstration, or scroll down for step-by-step instructions.
